ELECTRIC HEATING WHEN YOU WANT IT

DAY & NIGHT

BEFORE YOU HEAR ABOUT QUANTUM FROM US, HERE'S WHAT OUR CUSTOMERS SAY ABOUT IT.

—

“ We put the Quantum on for an hour in the morning and again in the afternoon to take the chill off the room and it does not run out in the evenings. It's much easier to use, we can set the controls to have full control of the heating. ”
Mr & Mrs P, Herefordshire.

“ I didn't want the hassle of running gas in with more pipes, cutting holes in the walls, finding space for a boiler, not to mention the cost. When my installer friend said 'always go for Dimplex, they are the best', the whole process was easy. I noticed a big difference immediately. ”
Mr M, London.

“ All the residents I have spoken to have noticed a significant saving in their electricity bills and the best thing is that the heaters are so easy to use. Once the controls are set you don't need to touch them. ”
Mr W, Birmingham.

THE FUTURE OF ELECTRIC HEATING. AVAILABLE TODAY.

—

If you're frustrated with your old, outdated storage heaters, the award-winning Dimplex Quantum off-peak heater will totally transform your heating and your home.

Whether it's coming home from work, curling up in front of the TV in the evening or waking up in the morning, our electric heaters create a welcoming, cosy home – 24 hours a day. They're the world's most advanced off-peak heaters – designed, developed and manufactured in the UK by Dimplex, the world's leading electric heating appliance manufacturer.

INNOVATIVE
&
UNRIVALLED

THE MOST ECONOMICAL ELECTRIC HEATING SYSTEM ON THE MARKET TODAY.

—

Quantum is up to 27% cheaper to run than a standard storage heater system and up to 47% cheaper to run than an electric convector or radiator system*. That's because it efficiently uses low-cost, off-peak energy. So, while Quantum is warming your home, it's saving you money too.

COMPLETE CONTROL AND COMFORT. 24-7.

—

Quantum's revolutionary iQ controller^ automatically responds to changing weather conditions and your heating requirements to maintain your ideal room temperature. You can also adjust the heat levels manually if you prefer, using the easy-to-read display and user-friendly rotary control, to give you instant heat when you need it – day or night.

DESIGNED FOR ANY ROOM – BUILT TO LAST.

—

Its sleek, modern, slimline design is compact enough for any sized room and can be installed as a standalone heater or part of a system in multiple rooms. No matter how many you need though, you can rest assured knowing you've got highly reliable, maintenance-free heaters creating a comfortable, warm environment for you.

* Calculated using SAP 2012 – the only Government approved energy performance assessment method.

^ Patent applied for.

CONTROLLABLE
&
ECONOMICAL

UNIQUE TECHNOLOGY, LEADING INNOVATION.

Quantum is the result of our commitment to product development and innovation. The technology is unique and is protected by patents in the UK and abroad, which is why you won't find it in anyone else's products.

BE WARM AND COMFORTABLE 24-7. INTELLIGENT TEMPERATURE CONTROL.

The innovative, built-in iQ controller[^] monitors the weather and your heating habits, then automatically adjusts so you can enjoy your perfect room temperature – without lifting a finger.

GREAT VALUE. GREAT SAVINGS.

An independent test has shown that a heating system using a mix of Quantum off-peak heaters and direct acting convectors (such as the Dimplex Q-Rad) can offer running cost savings of up to £418 per annum when compared to a manual static storage system, and up to £975 when replacing an electric convector or radiator system on standard tariff.**

BUY WITH CONFIDENCE. WE'RE THE WORLD'S LARGEST ELECTRIC HEATING APPLIANCE MANUFACTURER.

We have nearly 70 years of experience and our own in-house research, development, design and manufacturing facilities – all right here in the UK.

[^] Patent applied for.

^{**}Based on 90m² 3-bed semi-detached house complying with 1960s' Building Regulations. Manual storage system comprises a mix of storage heaters plus direct acting convectors.

[†] Terms and conditions apply. Product must have been installed in accordance with manufacturer's instructions. Please see website for details.

RELAX. QUANTUM COMES WITH A 10-YEAR WARRANTY.[†]

Enjoy a wonderfully warm home and sleep soundly knowing Quantum's designed to be extremely reliable and maintenance free. However, for additional peace of mind, we give you a 10-year warranty as standard.

SAFETY FIRST. QUANTUM IS CERTIFIED TO THE HIGHEST STANDARD.

Unlike most electric heaters from other countries, Quantum is BEAB Approved – the highest safety standard achievable in the UK.

UPGRADE
&
BENEFIT

GETTING A WARM, COMFORTABLE HOME COULDN'T BE EASIER.

To ensure you get the most effective, cost-efficient Quantum system for your home, we can arrange for one of our approved installer partners to carry out a no-obligation survey.

It should only take about 30 minutes and the installer can then answer any questions you may have about the system options. Then we'll provide you with a detailed quote for the supply and installation of your heater(s), although as a guide a single Quantum heater costs from just £699, fully installed.*

If you're happy with your quote, we'll arrange a convenient time to fit your system, which our experienced, approved installers will do with minimal disruption – they'll even take your old heaters away. You'll hardly notice they've been – until you sit back, relax and realise how much warmer and more comfortable your home is.

*£699 is the representative installation price for a QM050 into a position where the necessary electrical connections are present. Actual installation costs will vary, however these will be detailed in your personalised, no-obligation quotation.

To arrange your no-obligation survey,
simply call 0800 028 6122 or email pre-sales@dimplex.co.uk
