

Installer feedback on Dimplex Quantum

"Quantum is by far the biggest leap forward for electric heating in a long time. I think it is a great product and would happily fit them in my own home."

"As an installer, the Quantum heater is really well designed and all the details have obviously been thought through to ensure we can fit the heaters safely and with minimal hassle. I like the fact that the Quantum just feels really solid and substantial which gives you confidence that it's a quality job and it won't let you down."

"I find the Quantum heater brilliant to install, very straightforward and easy."

"We've had nothing but good feedback from the customers who have been delighted with how attractive Quantum looks and how easy they are to use. We see it especially when Quantum is replacing an older style heater - the customers can go out leaving us to get on with the job and when they come back a short while later, the transformation is done. When they see their new heaters they are over the moon and that's really satisfying."

“ I find the Quantum heater brilliant to install, very straightforward and easy. ”

"The controls on Quantum are very sophisticated but simple at the same time. They can be set to meet the needs of individual customers – for some people we set them on multiple timings while others prefer to just set the required temperature themselves and adjust it as they wish."

"I installed some Quantum heaters in a 2-bed bungalow. The owners wanted to enjoy their retirement without spending a fortune on heating, during the coldest months, their LPG heating was costing them £100 a week. They researched the alternatives very carefully and specified the Dimplex Quantum so next winter should be much more affordable."

"We have been impressed with the new Dimplex Quantum, our engineers found them very easy and quick to install. Handling was effortless, with the adjustable feet and reversible cable entry points."

"We had a two-person team installing Dimplex Quantum and other heaters as part of a heating system upgrade programme in social housing properties. The replacement scheme was really quick."

"All the occupants were really pleased and everyone commented on how smart they look. But the thing they are most pleased about is lower fuel bills. The Dimplex Quantum heater experience has been very positive and we'll be recommending them and using them in the future."
